RAVISH RAHEJA

+918901713798 ◇ Gurugram, Haryana
www.ravishraheja@gmail.com ◇ linkedin.com/in/ravish-raheja/ ◇ github.com/r-ravish

SKILLS

Languages	C, C++, Python, Java, SQL, JavaScript
Frameworks & Technologies	Django, REST APIs, FastAPI, React, OpenAI API, MCP, RAG
DevOps & Tools	Linux, NGINX, Uvicorn, Postman, Git, Docker, Jupyter Notebook
Cloud & Databases	PostgreSQL, SQLite, MongoDB, Microsoft Azure, Microsoft Foundry, Firebase

PROJECTS

SmartBase - Enterprise AI Knowledge Agent Live Demo

Led delivery of an enterprise policy assistant on **Microsoft Foundry**. Built a **RAG pipeline on Azure AI Search** with citation backed answers, multi turn agent memory, and automatic ticket escalation via **MCP tools**. Built a **22 case evaluation suite across 7 categories** covering grounding, citation accuracy, and escalation, achieving a 100% pass rate.

Technical Challenge: Fixed misleading Azure AI Foundry citations with two phase extraction, matching cited document IDs against MCP retrieval metadata, and added 30+ knowledge gap phrase checks to suppress citations when the agent couldn't answer.

AURA - AI for Unleashing Radiant Abilities

Created the perception layer of a human centred AI communication training system. Developed AI pipelines for real time speech capture, real time speech to text processing and behavioral signal extraction using NLP and leveraging OpenAI APIs and speech processing APIs models. Integrated backend services for seamless real-time interaction between the various AI components.

Technical Challenge: Designing the perception and feedback pipeline so that behavioral signals are interpreted in a psychologically safe way, avoiding judgment while still enabling meaningful adaptation.

Route53 Clone - Cloud DNS Management Console Live Demo

Engineered a full stack DNS management platform replicating the AWS Route53 console using **FastAPI (Python) and Next.js 16** with the AWS cloudscape design system. Implemented **14 REST API endpoints** supporting the full lifecycle of CRUD for public/private hosted zones and 9 DNS record types, achieving $<$ **2.1ms p95 read latency at 600 RPS locally**.

EDUCATION

Bachelor's in Computer Science and Engineering, Chitkara University Expected 2028

CGPA: 9.82

Relevant Coursework: Operating Systems, Computer Networks, OOPS, Databases, Machine Learning, Cloud Computing

CERTIFICATIONS

Microsoft Certifications - **AI-900**, **DP-900**, **AZ-900**, Power BI Data Analyst **(PL-300)**, Azure AI Apps and Agents Developer Associate **(AI-103)**

ACHIEVEMENTS

- **1st Prize** – IoT Sensex for developing **CampusPay**, an Arduino RFID contactless payment system (Django REST) with Random Forest demand forecasting
- **Winner** – ElevenLabs Track Prize for innovative use of real time voice and conversational AI in **AURA**.

LEADERSHIP AND ACTIVITIES

- **President** for **GeeksforGeeks Student Chapter**, Led a core team of 15+ members; organized 12+ workshops, hackathons, and coding events, impacting 400+ students and promoting technical skills across campus.
