EDUCATION

Bachelor's in Computer Science and Engineering, Chitkara University

Expected 2028

CGPA: 9.82

Relevant Coursework: OOPS, Databases, **Machine Learning**, **Cloud Computing**.

CERTIFICATIONS

Microsoft Certifications

Azure AI Fundamentals (**AI-900**), Azure Data Fundamentals (**DP-900**), Azure Fundamentals (**AZ-900**), Power BI Data Analyst (**PL-300**)

SKILLS

Languages

Python, Java, C++, SQL, JavaScript.

Frameworks & Technologies

Django, FastAPI, Machine Learning, NLP, OpenAI API, Hugging Face

Cloud & Data

Microsoft Azure, Power BI, Data Analysis, Firebase, Supabase

Tools and Utilities

Git, Jupyter Notebook

PROJECTS

CampusPay – IoT Based Contactless Payment System

Spearheaded and built an IoT based contactless payment system integrating Arduino RFID hardware with a **Django REST** backend to enable secure campus transactions.

System capable of handling hundreds of campus transactions with low latency. Implemented scalable REST APIs and structured database models for reliable hardware and software communication. Developed a **Random Forest** prediction model to support data driven demand forecasting across campus operations.

Technical Challenge: Prevented duplicate RFID transactions using idempotent APIs and debounce logic.

AURA - AI for Unleashing Radiant Abilities

Developed the perception layer of a human centered AI communication training platform. Built AI pipelines for real time speech capture, speech to text processing, and behavioral signal extraction using **NLP** and leveraging **OpenAI APIs** and speech processing APIs models. Integrated backend services to enable seamless real time interaction between AI components.

Technical Challenge: Designing the perception and feedback pipeline so that behavioral signals are interpreted in a psychologically safe way, avoiding judgment while still enabling meaningful adaptation.

BorrowMyBrain

Designed RESTful backend APIs for seamless client-server communication knowledge sharing platform using Django, HTML, CSS, JavaScript, and SQLite. Implemented backend APIs and database architecture to connect users with experts for knowledge exchange. Focused on scalable design and clean user experience.

ACHIEVEMENTS

- **1st Prize** – IoT Sensex for developing **CampusPay**, an IoT powered contactless payment platform with ML based demand forecasting.
- **Winner** – ElevenLabs Track Prize for innovative use of real time voice and conversational AI in **AURA**.

LEADERSHIP AND ACTIVITIES

- **Outreach Head for GeeksforGeeks Student Chapter**, Actively working as part of the core team at Chitkara University, organizing 12+ workshops, hackathons, and coding events, impacting 400+ students and promoting technical skills across campus.
